PREFACE

CBSE as a pace setting national Board has constantly been striving to design its evaluation process in a manner that it is used as a powerful means of influencing the quality of teaching and learning in the classroom situation. Also, it has to be so designed that it provides constant feedback regarding the effectiveness of the course content, classroom processes and the growth of individual learners besides the appropriateness of evaluation procedures.

As a move in this direction, CBSE started the practice of publishing the Marking Schemes with twin objectives in mind-(i) making the system more transparent and at the same time, (ii) ensuring high degree of reliability in scoring procedure.

Who are the markers of answer scripts? How do they mark the answer scripts? How can it be ensured that marking is fair, objective and reliable? Questions of these types naturally arise in the minds of candidates appearing in the public examination. These questions are equally pertinent to the teachers who are not adequately exposed to the CBSE system of marking.

Answer Scripts marking is a specialised job. It is assigned to teachers-PGTs for Class XII and TGTs for Class X who are in direct touch with the subject and have a minimum of 3 years experience of teaching the subject at that level. Appointment of examiners is made in accordance with the well-defined norms. Markers examine scripts with the help of detailed guidelines called the 'Marking Schemes'.

It is this tool (Marking Scheme) alongwith the extensive supervisory checks and counter-checks through which CBSE tries to ensure objective and fair marking. The present publication is being brought out with a view to serving the following objectives :

- (i) To give an opportunity to the teachers and students to look into the Marking Schemes that were developed by the Board and supplied to the evaluators in 2010 main examination in some selected main subjects.
- (ii) To receive feedback and suggestions from institutions/subject teachers on the utility and further improvement of Marking Schemes.
- (iii) To encourage institutions to undertake similar exercise of developing marking schemes for classes other than those covered by the Board's examination with a view to increasing teachers' responsiveness to them as the essential tools of evaluation.

HOW TO USE

Teachers and the students preparing for Class XII examination of the Board constitute the primary interest-group of this publication. Marking Schemes of Question Papers in the subjects of English Core, Functional English, Mathematics, Economics, Business Studies, Accountancy and Entrepreneurship administered in Delhi and Outside Delhi during the 2010 main examination have been included in this document. Some tips on their usage are given below :

(a) To Teachers :

- Go through the syllabus and the weightage distribution for the subject carefully.
- Read the question paper to find out how far the question paper set subscribes to the prescribed design. Grade every question by difficulty level for students who have taken the main Board examination.
- Consult the 'Marking Scheme' for each question, with reference to steps into which answers and awards have been divided.
- Work out concrete suggestions for the Board.

(b) To Students :

- Study each question carefully, comprehend them and write down the main points of the answer and note down their difficulties for clarification.
- Examine a question in conjunction with the Marking Scheme and find out the proximity of the answer to that suggested in the Marking Scheme.
- We will feel motivated if this publication is commented upon by practitioners in the context of its impact on their teaching learning strategies. Contribution of the experts and the officials of the Board in bringing out this document is gratefully acknowledged.

We urge the teachers to encourage their students to make use of this publication and at the same time to enrich us with their free and frank reactions.

QUESTION PAPER CODE 1/1/1

SECTION A : READING

20 Marks

1. Read the passage given below and answer the questions that follow:

12 marks

1. Today's woman is a highly self-directed person, alive to the sense of her dignity and the importance of her functions in the private domestic domain and the public domain of the world of work. Women are rational in approach, careful in handling situations and want to do things as best as possible. The Fourth World Conference of Women held in Beijing in September 1995 had emphasised that no enduring solution of society's most threatening social, economic and political problems could be found without the participation and empowerment of the women. The 1995 World Summit for Social Development had also emphasised the pivotal role of women in eradicating poverty and mending the social fabric.
2. The Constitution of India had conferred on women equal rights and opportunities - political, social, educational and of employment - with men. Because of oppressive traditions, superstitions, exploitation and corruption, a majority of women are not allowed to enjoy the rights and opportunities, bestowed on them. One of the major reasons for this state of affairs is the lack of literacy and awareness among women. Education is the main instrument through which we can narrow down the prevailing inequality and accelerate the process of economic and political change In the status of women.
3. The role of women in a society is very important. Women's education is the key to a better life in the future. A recent World Bank study says that educating girls is not a charity, it is good economics and if developing nations are to eradicate poverty, they must educate the girls. The report says that the economic

and social returns on investment in education of the girls considerably affect the human development index of the nation. Society would progress only if the status of women is respected and the presence of an educated woman in the family would ensure education of the family itself. Education and empowerment of women are closely related.

4. Women's education has not received due care and attention from the planners and policy makers. The National Commission for Women has rightly pointed out that even after 50 years of independence, women continue to be treated as the single largest group of backward citizens of India. The role of women in overall development has not been fully understood nor has it been given its full weight in the struggle to eliminate poverty, hunger, injustice and inequality at the national level. Even when we are at the threshold of the 21st century, our society still discriminates against women in matters of their rights and privileges and prevents them from participating in the process of national and societal progress. Various Committees and Commissions have been constituted before and after the independence to evaluate the progress in women's education and to suggest ways and means to enhance the status of women. The female literacy rate has gone up in the 20th century from 0.6 percent in 1901 to 39.29 percent in 1991 but India still possesses the largest number of illiterate women in the world. The female literacy index for the year 1991 shows that there are eight States which fall below the national average. The most populous States of the country, UP, MP, Bihar and Rajasthan fall in the category of most backward States as far as female literacy is concerned.
5. The prevailing cultural norms of gender behaviour and the perceived domestic and reproductive roles of women tend to affect the education of the girls. Negative attitude towards sending girls to schools, restrictions on their mobility, early marriage, poverty and illiteracy of parents affect the girl's participation in education.
6. Women's political empowerment got a big boost with the Panchayati Raj Act of 1993 which gave them 30 percent reservation in Village Panchayats, Block Samities and Zila Parishads throughout the country. The National Commission for Women was also set up in 1992 to act as a lobby for women's issues.
7. The educational system is the only institution which can counteract the deep foundations of inequality of sexes that are built in the minds of people through the socialization process. Education is the most important instrument of human resource development. Educational system should be used to revolutionise the traditional attitudes and inculcate new values of equality.
 - (a) (i) Mention any two attributes of a modern woman. 2
 - (ii) Why are women's participation and empowerment considered necessary? 2

- | | |
|--|------------------|
| (iii) Which factors adversely affect the education of girls? | 2 |
| (iv) What benefits did the women get with the enactment of the Panchayati Raj Act of 1993 ? | 2 |
| (v) By what process can we remove the sense of inequality of sexes from the minds of the people? | 1 |
| (b) Pick out words from the passage which mean the same as each of the following: | 1 × 3 = 3 |
| (i) cruel and unfair (para 2) | |
| (ii) remove (para 3) | |
| (iii) full of people (para 4) | |

2. Read the passage given below and answer the questions that follow: **8 marks**

Despite all the research, everyone of us catches cold and most of us catch it frequently. Our failure to control one of the commonest of all ailments sometimes seems ridiculous. Medical science regularly practises transplant surgery and has rid whole countries of such killing diseases as Typhus and the Plague. But the problem of common cold is unusually difficult and much has yet to be done to solve it.

It is known that a cold is caused by one of a number of viral infections that affect the lining of the nose and other passages leading to the lungs but the confusing variety of viruses makes study and remedy very difficult. It was shown in 1960 that many typical colds in adults are caused by one or the other of a family of viruses known as rhinoviruses, yet there still remain many colds for which no virus has as yet been isolated.

There is also the difficulty that because they are so much smaller than the bacteria which cause many other infections, viruses cannot be seen with ordinary microscopes. Nor can they be cultivated easily in the bacteriologist's laboratory, since they only grow within the living cells of animals or plants. An important recent step forward, however, is the development of the technique of tissue culture, in which bits of animal tissue are enabled to go on living and to multiply independently of the body. This has greatly aided virus research and has led to the discovery of a large number of viruses. Their existence had previously been not only unknown but even unsuspected.

The fact that we can catch cold repeatedly creates another difficulty. Usually a virus strikes only once and leaves the victim immune to further attacks. Still we do not gain immunity from colds. Why? It may possibly be due to the fact that while other viruses get into the blood stream where anti-bodies can oppose them, the viruses causing cold attack cells only on the surface. Or it may be that immunity from one of the many different viruses does not guarantee protection from all the others. It seems, therefore, that we are likely to have to suffer colds for some time yet.

Women are rational in approach, careful in handling situations and want to do, things as best as possible. The Fourth World Conference of Women held in Beijing in September 1995 had

emphasised that no enduring solution of society's most threatening social, economic and political problems could be found without the participation and empowerment of the women. The 1995 World Summit for Social Development had also emphasised the pivotal role of women in eradicating poverty and mending the social fabric.

- 2 The Constitution of India had conferred on women equal rights and opportunities - political, social, educational and of employment - with men. Because of oppressive traditions, superstitions, exploitation and corruption, a majority of women are not allowed to enjoy the rights and opportunities, bestowed on them. One of the major reasons for this state of affairs is the lack of literacy and awareness among women. Education is the main instrument through which we can narrow down the prevailing inequality and accelerate the process of economic and political change in the status of women.
- 3 The role of women in a society is very important. Women's education is the key to a better life in the future. A recent World Bank study says that educating girls is not a charity, it is good economics and if developing nations are, to eradicate poverty, they must educate the girls. The report says that the economic and social returns on investments in education of the girls considerably affect the Human Development Index of the nation. Society would progress only if the status of women is respected and the presence of an educated woman in the family would ensure education of the family itself. Education and empowerment of women are closely related.
- 4 Women's education has not received due care and attention' from the planners and policy makers. The National Commission for Women has rightly pointed out that even after 50 years of independence, women continue to be treated as the single-largest group of backward citizens of India. The role of women in overall development has not been fully understood nor has it been given its full weight in the struggle to eliminate poverty, hunger, injustice and inequality at the national level. Even when we are at the threshold of the 21st century, our society still discriminates against women in matters of their rights and privileges and prevents, them from participating in the process of national and societal progress. Various committees and commissions have been constituted before and after Independence to evaluate the progress in women's education and to suggest ways and means to enhance the status of women. The female literacy rate has gone up in the 20th century from 0.6 percent in 1901 to 39.29 percent in 1991 but India still possesses the largest number of illiterate women in the world. The Female Literacy Index for the year 1991 shows that there are eight states which fall below the national average. The most populous states of the country, UP, MP, Bihar and Rajasthan fall in the category of most backward states as far as female literacy is concerned.

- 5 The prevailing cultural norms of gender behaviour and the perceived domestic and reproductive roles of women tend to affect the education of the girls. Negative attitude towards sending girls to schools, restrictions on their mobility, early marriage, poverty and illiteracy of parents affect the girls' participation in education.
- 6 Women's political empowerment got a big boost with the Panchayati Raj Act of 1993 .which gave them 30 percent reservation in Village panchayats, Block samities and Zila parishads throughout the country. The National Commission for Women was also set up in 1992 to act as a lobby for women's issues.
- 7 The educational system is the only institution which can counteract the deep foundations of inequality of sexes that are built in the minds of people through the socialization process. Education is the most important instrument of human resource development. Educational system should be used to revolutionise the traditional attitudes and inculcate new values of equality.

2. Read the passage given below and answer the questions that follow: **8 marks**

Despite all the research, everyone of us catches cold and most of us catch it frequently. Our failure to control one of the commonest of all ailments sometimes seems ridiculous. Medical science regularly practices transplant surgery and has rid whole countries of such killing diseases as Typhus and the Plague. But the problem of common cold is unusually difficult and much has yet to be done to solve it.

It is known that a cold is caused by one of a number of viral infections that affect the lining of the nose and other passages leading to the lungs but the confusing variety of

viruses makes study and remedy very difficult. It was shown in 1960 that many typical colds in adults are caused by one or the other of a family of viruses known as rhinoviruses, yet there still remain many colds for which no virus has as yet been isolated.

There is also the difficulty that because they are, so much smaller than the bacteria which cause many other infections, viruses cannot be seen with ordinary microscopes. Nor can they be cultivated easily in the bacteriologist's laboratory, since they only grow within the living cells of animals or plants. An important recent step forward, however, is the development of the technique of tissue culture, in which bits of animal tissue are enabled to go on living and to multiply independently of the body. This has greatly aided virus research and has led to the discovery of a large number of viruses. Their existence had previously been not only unknown but even unsuspected.

The fact that we can catch cold repeatedly creates another difficulty. Usually a virus strikes only once and leaves the victim immune to further attacks. Still, we do not gain immunity from colds. Why? It may possibly be due to the fact that while other viruses get into the bloodstream where antibodies can oppose them - the viruses causing cold attack cells only on the surface. Or it may be that immunity from one of the many different viruses does not guarantee protection from all others. It seems, therefore, that we are likely to have to suffer colds for some time yet.

QUESTION PAPER CODE 212/1

SECTION A : READING

(20 Marks)

1. Read the passage given below and answer the questions that follow:

12 marks

- (1) One afternoon Mr. Ras Mohun took those of us boys who were visually challenged behind the school building to a little vacant area behind the wall of the Tata mill. Here he let us feel four waist high metal wires and what he called the starting and finishing poles, between which the wires had been strung. The wires formed three long lanes, each a few feet wide. Each wire had a hoop about the size of a thick bangle hanging from it.
- (2) “It is modelled on a racing track for the blind which I saw at Perkins in America. We will have races for you here every week.”
- (3) Mr. Ras Mohun positioned Abdul, Reuben and me in separate lanes, at the starting posts, and showed us how to catch hold of the metal hoop by a string that hung from it, and then run with the wire as our guide.
- (4) Mr. Ras Mohun called out “Ready, steady, go !”
- (5) I had never run so fast. I imagined myself an arrow flying from one post to the other.
- (6) “Oh, my God, they are going to kill themselves !” I heard Mr. Ras Mohun exclaim as I fell sidewise, almost wrapping myself around the finishing post and hitting my mouth on it.
- (7) “Any of you badly hurt ?” Mr. Ras Mohun asked running up to us.

- (8) All three of us had bleeding mouths and bleeding foreheads. There had been no way for us to know when we were coming to an end so we had all fallen down and hurt ourselves at the finishing post.
- (9) Mr. Ras Mohun sent for tincture of iodine and bandages and after he had attended to our injuries he said almost to himself, “Bless me, I can’t remember how they prevented such mishaps at Perkins.” He paused and then went on to us. “I know. I’ll station the Sighted Master at the finishing post with my bell. He can ring it during the races. From the sound of the ringing you will know how close you are to the end. As an added precaution, I’ll have a nice strong rope stretched across the lanes at the height of the wires just before the end so that if you fall you won’t hit the finishing post.”
- (10) After that every Saturday we had racing at the racing track. Mr. Ras Mohun would stand at the starting posts and get us off, and the Sighted Master would stand at the finishing post, behind the newly stretched rope and ring the bell. Abdul, Reuben and I were the three fastest runners, and whenever the school had visitors we three would be asked to put on a special racing exhibition, running different kinds of races we had learnt.
- (11) As time went on, the boys from a sighted school nearby came and joined us at our Saturday races. They would run outside the lanes. I was so eager to compete with them on even terms that now and again I would slyly let go of the string and hurl the hoop forward, so that I could run along the track like them for a time.

2. Read the passage given below and answer the questions that follow:

8 marks

How many times have we seen more-than-chubby children, pulled their cheeks lovingly, and exclaimed, “How cute !” It’s time for a reality check. Childhood obesity is on a rapid rise in this country, in keeping with an unhealthy global trend: in 2007, an estimated 22 million children under the age of five years were overweight according to the World Health Organisation, and more are expected to join the obese club.

In an alarming report presented by the Indian Heart Association, the thickness of the artery walls of teenagers who are obese were reported to resemble the thickness of an average 45-year-old’s artery walls. In other words, evidence was presented that obese children show early warning signs of heart disease. Childhood obesity is also linked to other serious health complications including juvenile diabetes. We can no longer dismiss it as a problem of the West. We might not be grappling with a problem as huge as in the US - where childhood obesity is considered an epidemic - or in the UK. But trouble is knocking on our doors, as well as those of other developing countries like China, Brazil and Thailand.

A recent ‘Indian Pediatrics’ report makes this point. Unlike in much of the West, where childhood obesity is more prevalent among low-income groups, in India it is a malaise that afflicts the better off. The prevalence of obesity is higher in the upper socio-economic class (4.8 per cent) as compared to the lower socio-economic class (1 per cent). In urban Delhi, about 37 per cent of children are either overweight or obese. Medical experts attribute the weighty troubles of developing countries to changed dietary habits - an overdose of fast and processed foods - and a steep drop in levels of physical activity.

An unhealthy diet is partly a function of the greater access and choice that the expanding middle class has. And partly because of the compulsions of modern urban

life, where both parents often work and prefer quick and easy processed food options rather than cooking every meal from scratch. City children today are also more inclined to spend leisure as couch or mouse potatoes, which does not help in the battle against the bulge. Concerted efforts involving schools, families and government to tackle juvenile obesity are in order. For a start, policymakers must invest in educating parents, especially mothers, about the perils of childhood obesity. And it would be of immense help if we, as a society, got over our peculiar proclivity to associate overweight - especially when it concerns children - with 'well-fed' and 'healthy'.

- (a) On the basis of your reading of the above passage, make notes on it using headings and sub-headings. Use recognizable abbreviations wherever necessary. 5
- (b) Using the notes write a summary of the above passage in 80 words. 3

QUESTION PAPER CODE 212
SECTION A : READING

1. Read the following passage and answer the questions that follow: **12 marks**

- 1 Why should I meet young students in particular? Seeking the answer I went back to my student days. From the island of Rameswaram, what a great journey it's been! Looking back it all seems quite incredible.
- 2 What was it that made it possible? Hard work? Ambition? Many things come to my mind. I feel the most important thing was that I always assessed my worth by the value of my contribution. The fundamental thing is that you must know that you deserve the good things of life, the benefits that God bestows. Unless our students and young believe that they are worthy of being citizens of a developed India, how will they ever be responsible and enlightened citizens?
- 3 There is nothing mysterious about the abundance in developed nations. The historic fact is that the people of these nations - the G8 as they are called - believed over many generations that they must live a good life in a strong and prosperous nation. The reality became aligned with their aspirations.
- 4 I do not think that abundance and spirituality are mutually exclusive or that it is wrong to desire material things. For instance, while I personally cherish a

life with minimum of possessions, I admire abundance, for it brings along with it security and confidence, and these eventually help preserve our freedom. Nature too does not do anything by half measures, as you will see if you look around you. Go to a garden. In season, there is a profusion of flowers. Or look up. The universe stretches into infinitude, vast beyond belief.

- 5 All that we see in the world is an embodiment of energy. We are a part of the cosmic energy too, as Sri Aurobindo says. Therefore when we begin to appreciate that spirit and matter are both part of existence, are in harmony with each other, we shall realize that it is wrong to feel that it is somehow shameful or non-spiritual to desire material things.
- 6 Yet, this is what we are often led to believe. Certainly there is nothing wrong with an attitude of making do with the minimum, in leading a life of asceticism. It has to be a matter of choice. You follow such a lifestyle because it answers a need that arises from deep within you. However, making a virtue of sacrifice and what is forced upon you - to celebrate suffering - is a different thing altogether.
- 7 This was the basis of my decision to contact our young. To know their dreams and tell them that it is perfectly all right to dream of a good life, an abundant life, a life full of pleasures and comforts, and work for that golden era. Whatever you do must come from the heart, express your spirit, and thereby you will also spread love and joy around you.

The modern garden has a history going back many thousands of years. Early humans were hunters and gatherers and usually did not stay in one place for a long time. Instead, they travelled from place to place following the food (plants and animals) according to the seasons. During the Neolithic period this slowly began to change; humans started to domesticate certain plants which meant they could remain in one place and grow their own food. The first 'garden' was a vegetable garden, where early humans cultivated different types of plants for food.

Evidence of early agriculture includes edible plants such as wheat and lentils and also includes more ornamental plants for decorative purposes. Plants for medicine were grown as were herbs and spices for flavouring or preserving food.

Certain plants also had religious or spiritual value and were not only grown because they were useful or edible but had a religious significance. They were planted to honour the Gods or used in religious ceremonies. Certain plants were sacred, for instance the tulsi. The ancient Greeks planted groves for their Gods, and many cultures believed that gardens were holy.

Gardens were a way to show that their owners were rich or powerful. Ancient rulers created huge gardens to display their wealth, in the same way that large places were symbols of prosperity. Sir Francis Bacon described gardens as "purest of human pleasures." The ancient Greeks believed that growing food was a job for the poor but gardens were places for enjoyment and contemplation. The English word 'Paradise' comes from the Persian word 'Pairidaeza' meaning a walled space; garden. One of the most famous early gardens was the Hanging Garden of Babylon. One of the Seven Wonders of the Ancient World, it was created 2,600 years ago, near the river Euphrates. It was designed so that the river could continually irrigate it and as a result was green all year around.

As gardens have developed over the years, design and beauty have become more and more important. Humans have learnt about Nature and to design gardens precisely, like a work of art or building. The gardens of Versailles, in France and our very own Mughal Gardens at the Rashtrapati Bhavan are excellent examples of "Garden Architecture" - everything is symmetrical and even the trees are pruned to fit in with the design.

Carefully planned or not, gardens are still beautiful and relaxing places to visit. On a fine day you might even find a little part of Paradise if you look hard.

Marking Scheme --- Mathematics

General Instructions :

1. The Marking Scheme provides general guidelines to reduce subjectivity in the marking. The answers given in the Marking Scheme are suggested answers. The content is thus indicative. If a student has given any other answer which is different from the one given in the Marking Scheme, but conveys the meaning, such answers should be given full weightage.
2. Evaluation is to be done as per instructions provided in the marking scheme. It should not be done according to one's own interpretation or any other consideration — Marking Scheme should be strictly adhered to and religiously followed.
3. Alternative methods are accepted. Proportional marks are to be awarded.
4. In question(s) on differential equations, constant of integration has to be written.
5. If a candidate has attempted an extra question, marks obtained in the question attempted first should be retained and the other answer should be scored out.
6. A full scale of marks - 0 to 100 has to be used. Please do not hesitate to award full marks if the answer deserves it.
